Changes from Previous Schedule

- Replaced turmeric/ginger/black pepper complex with Turiva 500 mg once daily.
- Replaced sea buckthorn Omega Complex (breakfast and dinner) with Ortho Omega, 1 capsule each morning.
- Changed CoQ10 from 100 mg to Ortho Molecular CoQ10 300 mg at lunch.
- Added CereMag 1 scoop before breakfast and BCAA powder 1 scoop after lunch.
- Added mixed-tocopherol Vitamin E 268 mg at lunch and 268 mg after dinner (536 mg/day).

Clinical Review / Verification

- Family-reported intake schedule, not a clinician-approved treatment plan. Alisa is not taking riluzole.
- Vitamin E: 536 mg/day as reported; check the product label for alpha-tocopherol content and discuss bleeding risk, especially with turmeric or blood thinners.
- Vitamin C: 3,000 mg/day exceeds the usual adult upper intake level of 2,000 mg/day.
- Vitamin D3: 5,000 IU/day exceeds the usual adult upper intake level of 4,000 IU/day; review with her clinician and laboratory results.
- Verify elemental magnesium per CereMag scoop, EPA/DHA per Ortho Omega capsule, and BCAA composition per scoop.
- No supplement listed here has been established to treat or reverse ALS. Review the full regimen with Alisa's clinician or pharmacist.

Record note: This is a dated protocol document; it does not confirm actual adherence or update an external app/database.
